MapboxGL
Chart.js
Fetch & Axios APIs
EJS Template Engine
REST APIs
Web Scraping (BeautifulSoup4)
Selenium
NPM
Git Workflow
Agile/SCRUM Practices
Bash Terminal
AWS S3 & EC2
Microsoft Office
Adobe InDesign/Illustrator/Photoshop

UI/UX

Wire-framing (Figma)
Accessibility (ARIA)
Design

PROFESSIONAL SUMMARY

Software engineer with 6 years of experience leading teams in B2B partnerships and assessing client needs. Passionate about creating a smooth front-end and user experience. Seeking a Software Engineer position with a company to produce high-quality solutions for customers, bringing programming experience in Javascript, JavaScript frameworks, and Python. A keen eye for creating a seamless UI/UX experience and replicating wire-frames.

EMPLOYMENT

FULL STACK SOFTWARE ENGINEER INTERN

Mintbean | Oct 2020 - Present

- Utilized React Hooks to promote clean and semantic code
- Estimated, performed feasibility analysis and forecast risks and planned the delivery for new requirements and bug fixes by doing full QA of product
- Delivered new features in Agile life-cycles using Github and MeisterTask
- Responsible for final bug fixes and needed features before product launch
- Weekly QA of Mintbean web application to help developers find stress points which are communicated by adding user stories to MeisterTask

ASSISTANT GENERAL MANAGER

Relish, Mauna Inc. | Nov 2016 - Nov 2019

- Updated the company website using WordPress
- Communicated with FOH and BOH for optimum customer satisfaction
- Established B2B relationships with purveyors for maximum profitability
- Managed staff of 25 with less than 20% turnover in 2 years

PROJECTS

Vacation Rentals Around Denver (VRAD)

- Utilized React Router to create dynamic endpoints based upon a data structure received as a promise from a fetch call to an API
- Used React Testing library and Jest to test React components and mock API calls with async/await by returning relevant data the front-end can utilize
- Used Trello to manage iterative development of this app by organizing objectives and user stories with a partner
- Repo: <https://github.com/dreardon1021/vrad> -- App: <https://edlsto.github.io/vrad/>

Rancid Tomatillos

- Used Redux to add global state to the global store while following a file structure that contains reducers, actions, and containers
- Worked with React Testing Library to fully test the complete workflow of Redux
- Optimized UI/UX design with wire-framing tools such as Figma
- Repo: <https://github.com/dreardon1021/rancid-tomatillos-app>
- App: <https://lmanriq.github.io/rancid-tomatillos-app/>

Covents

- Created a web scraper utilizing Python, BeautifulSoup4 library, and Selenium to navigate the web browser
- Used Python, Flask, and PostgreSQL to create a database and API which communicated data to a front-end built in Vue.js
- Repo: <https://github.com/Covents/covents-BE> -- App: <https://covents.netlify.app/#/>

Hearthstone for Beginners

- Used an API that required an API key from Rapid-API. Communicated with the third party API to receive data from a specific endpoint and provide correct data
- Used React Testing Library to test React components and Jest to mock API calls and functions within React components
- Repo: <https://github.com/dreardon1021/Hearthstone4Beginners>
- App: <https://dreardon1021.github.io/Hearthstone4Beginners/>

EDUCATION

TURING SCHOOL OF SOFTWARE AND DESIGN

Front End Engineering | Nov 2019 - June 2020
